Healing: I bring water from the Artesian Well. I discovered this well when I was concerned about my health.

The photo of the Umpqua River in my background today is from a memorial service from a dear friend.

The waters surrounding us center me and bring me peace.

My water and I come today from
Saptu, the name my mother and her
husband Roger have given their
shared home and place of spiritual
retreat.

Water is an expression of love for all
of life - for each of us who partake.

From the well on our daughter's horse
farm in Redmond. She's part of the
reason we moved here from MA.

My water was brought from the
filtered system downstairs by a dear
friend who has been helping me learn
how to exist in a wheelchair which will
be temporary, I hope; awaiting
surgery.

the water from our tap that she was
born into.
